S P E C I F I C A T I O N.

TO ALL WHOM IT MAY CONCERN.

BE IT KNOWN that we, L'AIR LIQUIDE, SOCIETE ANONYME POUR L'ETUDE ET L'EXPLOITATION DES PROCEDES GEORGES CLAUDE, of 48, Rue St Lazare, Paris, in the Republic of France, are in possession of an Invention for "Improvements in or relating to processes for the production of bi-carbonate of soda and of ammonium chloride"
and we the said L'AIR LIQUIDE, SOCIETE ANONYME POUR L'ETUDE ET L'EXPLOITATION DES PROCEDES GEORGES CLAUDE, do hereby declare the nature of the said Invention and in what manner the same is to be performed to be particularly described and ascertained in and by the following statement thereof, that is to say:-

In British Patent No. 131870 applicants have described a modification of Schreib's process (German Patent No. 36,093) consisting in the successive and alternate precipitation from the same liquid of bicarbonate of soda and of ammonium chloride. Now the object of the present invention is to avoid by employing a very different method of operation certain drawbacks of the processes described in the said British and German Patents

In order to understand properly the advantages of the new method, it is necessary to set forth briefly the method of operation described in the aforesaid British Patent which comprises the following:- (a) The warm mother liquor obtained as hereinafter set forth and containing chloride of ammonia with sea-salt, after filtration, has added to it ammonia and a suitable quantity of sea-salt. (b) The liquor is afterwards carbonated (addition of carbon dioxide) the temperature being maintained at a suitable value, but the carbonation is arrested upon the formation of hydrogen ammonium carbonate. (c) The solution is then cooled, while stirring, down to 5° or 10°C and pure ammonium chloride NH_4Cl is precipitated which is separated and filtered. (d) Finally the cold solution is again heated up to about 40°C a fresh quantity of sea-salt being dissolved therein and it is then subjected to the final carbonation which precipitates the bicarbonate of soda and which this time is continued until the practically complete transformation of the ammonia into ammonium chloride has taken place. The bicarbonate of soda precipitated is separated; the above mentioned treatment is recommenced with the liquid residue, ammonia and sea-salt being added thereto as in (a). The cycle of these operations is repeated indefinitely with the same liquid, said liquid being always brought up to its initial volume. It will be seen that under these conditions:-

atmospheres, or if better still these two means be combined the rapidity of the absorption is still further accelerated.

The CO_2 absorbing apparatus, which may be distinct from the NH_3 absorbing apparatus or be combined therewith must, in view of the absorption of the CO_2, be provided with a stirring device to enable good contact to be effected between the liquids and the gases (BOULOUVARD type for instance) and a water cooling system must be provided. The use of pure CO_2 and of an apparatus operating under pressure presents, amongst its other advantages, that of reducing the losses of ammonia by restricting the outlets of gas to simple periodic blow-through, directed furthermore through a washer. In place of the absorbing apparatus just referred to and by preference continuously working towers may be employed, especially when impure CO_2 is used.

The salt cannot be dissolved during the carbonating, but it is preferable to add some as the efficacy of each operation is thereby augmented as also the precipitation of $Na\ H\ CO_3$ and of $NH_4\ Cl$ per cubic metre of liquid during each cycle.

The bicarbonate of soda, thus precipitated in a practically pure state, is passed with its liquid on to a filter, washed with the minimum of water and dried. The mother liquor, to which a little NH_3 may be added to return the bicarbonates in solution to the state of neutral carbonates, is delivered into a crystalliser provided with stirring devices and cooling coils. The ammonium chloride is precipitated, in an abundance of fine crystals and in a state of purity,

by cooling continued with cooling water down to 15° to 18° C and completed if need be at 5° or 10°C provided artificial cooling apparatus be available. The ammonium chloride is collected on a filter and is washed with a minimum of water, that is to say merely replacing the mother liquor. The washing water serves to return the liquid to its initial volume. Owing to the rapidity of the carbonating several crystallisers may be fed by one single carbonator, especially if use be made of pure CO_2.

With the mother liquor of this operation the cycle of the preceding operations is re-commenced and so on.

Instead of adding successively NH_3 and then CO_2 to the saline solution of neutral carbonate of ammonia, there may be added direct a suitable quantity of bicarbonate of ammonia prepared in advance by using the waters employed for washing. Further, slight variations in the process described may obviously be made without departing from the present invention.

GENERAL DEPARTMENT.

Register No. 28 **of** 1921-22

Bangalore, the ..... *19* .

WHEREAS an application (Series no 21) dated the 30th June 1921 (based on British application no 8133 dt 15-3-21) and received on the 6th August 1921, has been submitted under Section 5 of the Mysore Inventions and Designs Regulation, 1894, by L'Air Liquide, Societe Anonyme Pour L'Etude et L'Exploitation des Procedes Georges Claude, of 48, Rue St Lazare, Paris

(hereinafter referred to as "the applicant") for leave to file a specification of an invention for 'Improvements in or relating to processes for the production of bicarbonate of soda and of ammonium chloride'

And whereas the applicant has duly complied with all the requirements of Section 5 of the said Regulation;

The Government of Mysore are pleased, under Section 6 of the said Regulation, to authorize the applicant to file a specification of the said invention in accordance with the provisions of the said Regulation.

ORDERED, that the applicant be, and he is hereby, informed accordingly.

By Order of the Government of Mysore,

Secretary to the Govt. of Mysore,
General Department.

Certified that the fees prescribed in the fourth schedule to the Mysore Inventions and Designs Regulation, 1894, in respect of the application for leave to file the said specification and of the filing thereof have been paid by the applicant, and that the specification hereinbefore described has been duly filed in accordance with the provisions of Section 8 of the said Regulation on this the 14th day of March 1922.

Secretary to the Govt. of Mysore,
General Department.

(Section 8 of the Inventions and Designs Regulation, 1894.)

8. (1) If within six months from the date of an order under Section 6, Sub-Section (1), or within such further time, not exceeding three months, as the Government of Mysore, in its discretion, may, on cause shown to its satisfaction and on payment of the fee prescribed in that behalf in the fourth schedule, see fit to allow, the applicant causes a specification of his invention to be filed in manner by this Part required, and the fee prescribed in the fourth schedule in respect of the filing of the specification to be paid, the applicant shall, subject to the other provisions of this Part, be entitled to the exclusive privilege of making, selling and using the invention in the Territories of Mysore, and of authorizing others so to do, for a term of fourteen years from the date of the filing of the specification.

(2) But an exclusive privilege in respect of an invention of a new manufacture shall, notwithstanding anything in Sub-Section (1), cease, if the inventor fails to pay, within the time limited in that behalf by the fourth schedule, any fee prescribed in that schedule in respect of the continuance of the privilege.

(3) If, nevertheless, in any case, by accident, mistake, or inadvertence, an inventor fails to pay any such fee within the time so limited, he may apply to the Government of Mysore for an enlargement of the time for making the payment.

(4) Thereupon the Government of Mysore may enlarge the time accordingly, on payment of the fee prescribed in that behalf in the fourth schedule, and subject to the following conditions, namely :—

(*a*) the time for making a payment shall not in any case be enlarged for more than three months ; and

(*b*) if any suit is instituted in respect of an infringement of the exclusive privilege committed after a failure to make a payment within the time limited for the making thereof and before the enlargement of that time, the Court disposing of the suit may, if it thinks fit, refuse to award or give any damages in respect of the infringement.
